

Mohammad Qaiser Siew Bin Mohd Qhadaffie

Software Engineer

Miri, Sarawak, Malaysia | qaisersiew123@gmail.com | github.com/notqai | [LinkedIn](#) | notqai.github.io/portfolio

Final-year Computer Systems and Networking student with hands-on software engineering experience across mobile (Kotlin/Compose), web (React), backend ML services (Python/Flask), and embedded systems (MQL5/ESP32). Built and shipped multiple end-to-end applications spanning Firebase-backed Android apps, real-time data pipelines, and automated trading systems. Cisco-certified in networking and security fundamentals.

Skills

Languages: Python, Kotlin, JavaScript, Pine Script v6, MQL5, C, SQL

Frameworks/Tools: React, Vite, Flask, Jetpack Compose, Android Studio, MetaTrader 5, TradingView

Cloud/Infra: AWS (IAM, VPC, EC2, EBS, RDS), Firebase, Netlify, ngrok

Other: Machine Learning (scikit-learn, Random Forest, SGD), REST APIs, Webhook integration, LaTeX

Projects

Automated Multiple Indicators Trading System (FYP)

2025 – 2026

Four-layer event-driven automated trading pipeline for XAUUSD (Gold) scalping

- Layer 1: Built a Pine Script v6 signal engine on TradingView with 5 zone modules — FVG, Order Block, QZone, Market Zone, Base Zone
- Layer 2: Implemented a webhook bridge via PineConnector and an ngrok tunnel
- Layer 3: Developed a Python Flask ML relay using a Random Forest + SGD Classifier ensemble with 13-feature extraction and a dynamic win threshold
- Layer 4: Executed trades through an MT5 Expert Advisor on an HFM broker demo account
- Built a standalone MTL_ResultReporter MQL5 EA to close the feedback loop by matching closed deals back to signals
- Supervised by Mr. Pang Po Ken, Curtin University Malaysia

Game Catalogue Android App

2025

Full Android mobile app for cataloguing games, built with Kotlin and Firebase

- Built a full Android mobile app using Kotlin, Jetpack Compose, Material Design 3, Firebase Authentication, and Firestore
- Implemented multi-screen navigation (Library, Favourites, Profile, Sign In) with add/edit/delete game entries and cross-screen search
- Added guest sign-in with automatic data cleanup on sign-out, animated UI transitions, and empty-state screens

Gold Tracker Web App

2025

Real-time XAUUSD news monitoring tool built with React and Vite

- Aggregated live RSS feeds from 5 sources (Kitco, Bloomberg, Politico, MarketWatch, Google News)
- Designed a rule-based analysis engine covering 28+ macro scenarios with per-headline XAUUSD impact analysis
- Built a dark trading-terminal UI, deployed to Netlify, and packaged as a native Android APK using Capacitor and Android Studio

Portfolio Website

2026

Personal portfolio site built with Claude Code on a full macOS developer setup

- Built using Claude Code with a full developer setup on macOS (Homebrew, VS Code, Warp, Raycast)

Additional Projects: *IoT Telegram Bot — ESP32 sensor node with ThingSpeak logging and Telegram remote control / AWS Cloud Infrastructure — multi-tier VPC with EC2, RDS, and least-privilege IAM design*

Freelance

Pine Script Developer

Self-Employed, Feb 2026 – Present

Client: Muhammed Zaidi

- Developed MTL Zone, a custom TradingView indicator using Pine Script v6
- Built multi-source zone detection covering QZones, Order Blocks, Fair Value Gaps, Base Zones, and Market Zones
- Added confluence scoring, ranging detection with visual warnings, breakout labelling, and instrument scaling for XAUUSD
- Delivered client-facing technical documentation and a catalogue PDF

Education

Bachelor of Technology in Computer Systems and Networking

Expected 2026

Curtin University Malaysia

Final Year Project: *Automated Multiple Indicators Trading System using MetaTrader 5* (Supervisor: Mr. Pang Po Ken)

Certifications

- [CCNA: Introduction to Networks](#) — Cisco Networking Academy
- [CCNA: Switching, Routing, and Wireless Essentials](#) — Cisco Networking Academy
- [CCNA: Enterprise Networking, Security, and Automation](#) — Cisco Networking Academy
- [CyberOps Associate](#) — Cisco Networking Academy
- [Network Security](#) — Cisco Networking Academy
